5. Testing

5.1 Test Plan

System testing is to check each step of the program and to make sure that each component of the system was working properly. The system was tested by inserting the username and password registering some people where the system accidentally saved their information in the database.

5.2 Test Cases

Test case #: 1	Test case name: Create records
System: Roll-Call	Subsystem: Database
Designed by: Team ID 2	Design date: 10 May 2022
Executed by: Team ID 2	Execution date: 12 May 2022
Short description: Test the feature of modifying records in Roll-Call	

Pre conditions:

Data should be available

S. No.	Action	Expected System Response	Pass/Fail	Comment
1.	Fill the details in creation form	System displays option of adding the record	PASS	
2.	Click on “add” option	System adds the record in database	PASS	
3.	Check post-condition 1			

Post condition:

1. The records are added to the database.

Test case #: 2	Test case name: Modify records
System: Roll-Call	Subsystem: Database
Designed by: Team ID 2	Design date: 10 May 2022
Executed by: Team ID 2	Execution date: 12 May 2022
Short description: Test the feature of modifying records in Roll-Call	

Pre conditions: Databases must exist.

S. No.	Action	Expected System Response	Pass/Fail	Comment
1.	Click on “modify”	System displays modification form	PASS	
2.	Make changes	System shows option “Save changes”	PASS	
3.	Click on “save changes”	System saves the changes made		
4.	Check post-condition 1			

Post condition: 2. The changes are saved in the database.

Test case #: 3	Test case name: Remove records
System: Roll-Call	Subsystem: Database
Designed by: Team ID 2	Design date: 10 May 2022
Executed by: Team ID 2	Execution date: 12 May 2022
Short description: Test the feature of removing records in Roll-Call	

Pre conditions: Databases must exist.

S. No.	Action	Expected System Response	Pass/Fail	Comment
1.	Click on “delete”	System displays confirmation form	PASS	
2.	Confirm deletion of record	System deletes the records	PASS	
3.	Check post-condition 1			

Post condition: 1. The records are removed from the database.

The above test cases were successfully executed according to the plan.
